- Worked as a Software Developer in **COZY INFOSYSTEM PVT LTD**, Hyderabad from Nov-2015 to Apr-2017.

- Worked as a Sr.Software Developer in **TRY-LOGIC SOFT SOLUTIONS AP PVT LTD**, Hyderabad from Dec-2013 to Apr-2015.

- Worked as a Software Engineer in **1000 Projects**, Hyderabad from June-2012 to Nov-2013.

Academic Profile:

Bachelor of Computer Application (BCA) from Kamla Nehru College Nagpur in the year 2012.

Master of Computer Science from Pandav College of Engineering Nassgpur pursuing.

Technical Skills:

Technology	: Oops PHP-7, C, Core Java.
Style Sheet Language	: Html5, CSS3, Bootstrap.
Scripting Language	: JavaScript, JSON, J-query, Ajax and Angular JS.
Framework	: Core HMVC Codeigniter, Laravel, Cake PHP, Drupal framework
Databases	: MYSQL, DB2-MAINFRAME, POSTGRE SQL, ORACLE and MS-SQL,
Structure Lang	: SQL, PL-SQL.
Server	: XAMPP SERVER, ZEND SERVER, LAMPP, APACHE SERVER.
CMS	: Wordpress, Joomla and Drupal, Magneto.
Tool Used	: Net Beans, Slim, Notepad++, Dream Weaver, Storm, Devops RTC Eclipse,

Operating System	**:** Windows XP/Vista/7/8/ LINUX
Services	**:** Rest API and web services.
Command Language	**:** SSH, Putty, mRemoteNG
Application Language:	Phone gap.

Knowledge on Generating Report:

R&D: Knowledge SQL Server or MySQL database to generate I-Report using SQL Server query for ERP Application.

Projects:

PROJECT #1:

Project Title	**: Health Plan Services (Wipro Limited)**
Technology	: Drupal PHP, MySQL, MSSQL, DB2, JQuery, Bootstrap, CSS, RTC
IDE	: PHP Storm. Notepad++, Eclipse RTC

Description:

- Lead a team of software developers programming applications for insurance industry clients.
- Assigned tasks to team members and ensure it is delivered timely.
- Daily status meeting and ensure there are no impediments.
- Maintain quality of applications delivered.
- Attend development and defects meetings and priorities.
- Design, develop and maintain enterprise level web sites.
- Designing, Coding and Unit Testing of code in PHP and API's (Rest and Soap).
- Develop front end using CSS, JavaScript and HTML
- Create queries and Tables in MySQL
- Implementation of code and changes from time to time. Consume requirements, produce functional and system design documentation, code development, planned test execution, isolated test environments, and controlled code promotion
- Maintaining code with source control (Dimensions and RTC)

Designed and looked over global resources for implementing NACHA standards for EFT payments, ensure all the application meet NACHA rules and guidelines regarding the dispute processing.

- Third party payer refund, implemented refund process for CSR to be able to request and approve third party payer refund using PHP and API's.
- Was part of team implemented new framework and application for group management for insurance companies.
- Digital document retrieval from Stellent repository.
- Added credit card expiration date update functionalities using cyber source API's
- implemented functionality to Hold or Cancel payments through application.
- Call recording marriage with case and retrieval using columbarium API's

- Implemented application to manage group insurance where user can create enrolment periods, create groups, upload excel sheet with group information.

PROJECT #2:

Project Title	: **Cozy Report**
URL	: http://cozyreports.com/
Technology	: Codeigniter, MySQL & Apache.
IDE	: Net Beans
Team Size	: 2
Description	:

By using this application to provide appropriate report the client, which is having the restaurant project by the organisation and store level. It's a web application which will show the daily and monthly turn about the store and organisation level. This application has been use for reporting purpose and by same application also providing services report to the Android and IOS application. By this application has one thing to show they by using JASPAR SERVER., this is tools for use to generate report?

Responsibilities:
- Developed the application User-interface
- Coding for the project i.e., creating fragments and making data connection.

PROJECT #3:

Project Title	: **Print MyAadhaar**
URL	: http://www.printmyaadhaar.com/
Technology	: Codeigniter Mysql.

IDE : Notepad ++, Net Bean

Team Size	: 3
Description	:

Developing this application for printing Aadhar card.Who is having aadhaar card want to me them as a plastic card, providing some payment integrations to make payment to the client? after that this project made version2 give admin side payment mode. Same application company sold to other clients who is taking requirement will do card dynamically. Provided web services to Java Application to send requirement to Machine. Manage MySQL and SQL Server database to store user requirement securely. It's high-level application to manage Google ranking to manage our application already a lot of application in the market. Some application company made our application copy application. Also did in this application for database migration to make some optimisation to make the website faster. Store information in Amazon cloud, give some services to other application which is also having our own product. Like as cozyPrint. Keep always ice on the server when down. Worked 24/7.

Responsibilities:
- Developed the application User-interface
- Coding for the project i.e., creating fragments and making data connection.

PROJECT #4:

Project Title	: **Cozy Erp Restaurants**
URL	: http://cozyerp.com/
Technology	: Codeigniter, MySQL & Apache.
IDE	: Notepad++
Team Size	: 3
Description	:

Cozy ERP application developed to manage the restaurant. In this application has been developed the number of restaurants which used to make them easy to manage the business. In ERP application take care about 120 clients which having all over the world. Managing the database is a big task. Also take care of the whole application. First, this application develop small part in Cake PHP after that it converted application in Codeigniter restructure the architecture and also made client compatible, having all data in the one place for that making the web services and giving Android application.

Responsibilities:
- Developed the application User-interface
- Coding for the project i.e., creating fragments and making data connection.

PROJECT #5:

Project Title	: **Tatva Global School (School ERP)**
URL	: http://www.tatvaglobalschool.com/

Technology: Codeigniter, MySQL (Pl-Sql) & Apache. .
IDE : Net Beans
Team Size : 4
Description :

This is college based product which is having different module related to college as like as student management, attendance management, examination, employee module, and report about all modules. It's like as ERP and CRM Application. In this project we used all advance level concept like as MySQL procedure, MVC and Web Services, logs, provided all security as much as possible in Codeigniter.

Responsibilities:
Developed the application User-interface and worked on Coding for the project.

PROJECT #6:
Project Title : **Office Management System**
Technology : Codeigniter, My-Sql& Apache
IDE : Net Beans & Notepad++
OS : Ubuntu (Linux), Window
Client : TNV Certification Pvt. Ltd, Uttar Pradesh.
Team Size : 2
Description:

The main purpose of this project is to issue ISO certifications to various organizations. This project is having two modules. One is Business Associative client module and Direct client module. The Certification process is mainly divided into three levels in every module.

1) Data entry operator level
2) Tele caller follow up level
3) Approval Level

In every level user will follow up the information given by the client to approve ISO certificate to the organization.

Responsibilities:
- ✓ Creating & designing the static & dynamic web applications.
- ✓ Development of web applications through programming.
- ✓ Test the application and identify any technical problems.
- ✓ Write the programming code either from scratch or by adapting existing website software and graphics packages to meet business requirements

PROJECT #7:
Project Title : **Vehicle Tracking Systems**
URL : **http://www.tracemyvehicle.com/**
Technology : Codeigniter, MySQL Web Services.
IDE : Notepad ++, Net Bean
Team Size : 3
Description :

Vehicle tracking systems project which is track vehicle using GPRS Device. it's some very big application to trace vehicle and Maintain database to generate report and All Activity shows on MAP. This Application if belong to ERP having so Many sales Client and own client and maintain the data in single Database For all organisations. This project is having so many Domains for the sales client.

Responsibilities:
- • Developed the application User-interface
- • Coding for the project i.e., creating fragments and making data connection.

PROJECT #8:
Project Title : **VendorSendor**
URL : **http://www.vendorsendor.com/**
Technology : Codeigniter, MySQL.
IDE : Notepad ++
Team Size : Single

Description **:**

VendorSendor Project it's providing excellent environment who looking job in the market. It's like as Naukri to post the requirement. Seeker and company having own registration to manage the requirement, for the company to giving free registration limited time purpose. After that need to pay some amount to admin through the application then he will update he has authority to update his account, provided some many facilities to Super admin side. He as all Kind authority to manage user and admin activity.

The main intention I got to send 1000 of mail to the user who is looking job in the market on all platforms. I did RND of this project to send mail use threading to manage all kind of data. Manage MySql Database also design database my own way. Post requirement and hotlist requirement also get some Mail from third party Gmail account from the current application. Provided PayPal integration to make payment. Also, Facebook post and Gmail grouping posting also there to send mail.

Responsibilities:
- Developed the application User-interface
. Design the module and Analysis Maintain all Software.

PROJECT #9:

Project Title	**: Switch Mate (RemoteSwitch)**
URL	**: http://www.remoteswitch.in/**
Technology	: Codeigniter, MySQL Web Services
IDE	: Notepad ++, Net Bean
Team Size	: Single
Description	:

RemoteSwitch Project developing for the Telangana Government, to handle electric Instrument by remotely, developing software to send message command to the device and managing all kind of reporting. Like as Light and power report. which is interrelated to the device. It's kind of Manage electric device with the help of the Software. it's containing the Software which Sends request and response to the device. light ON || OFF like that, based on the device performance. the device has also network means sim card attached to the I will send data in every 2 Second. Based on this has to generate report will show all related information to that device. Generating reporting based on the location ID. Managing users based on the groups. Groups are related to the location, it's managing like as if I have to create the Group like as INDIA, I will make as super Admin, Having State Us group will be created create the user for the User. Like that managing group and users.

Developing this project is main aim is that to SAVE TIME *** SAVE POWER *** SAVE MONEY.

Responsibilities:
- **This project is belong to Gov. Agencies**
- **Working on this project.**
-

PROJECT #10:

Project Title	**: Property handling**
Technology	: HMVC code igniter, MySQL, J-Query, bootstrap, Services
IDE	: Notepad++
Team Size	: 4 Team.
Description	:

Developed property handling project as a project manager. Got this project from the client also having some developer whose shit in our office try to provide them with complete guidance. Having good knowledge about this project got an excellent idea about property management. Support them in every part of the project, to design the database also in logical part. it's purely based on the dynamic property handling. Also got client attention to make this project excellent product.

PROJECT #11:

Project Title	**: Cozy Report MOBI APP**
Technology	: J-Query, bootstrap, Services
IDE	: Eclipse
Team Size	: Single
Description	:

Developed app to CozyReport using jquery, Ajax, bootstrap, html to make confortable for IOS and android, window app. also provide all services which require to developed app.

Responsibilities:
- **Working on the entire project.**
- **Provided services using Codeigniter framework And wrote all query and logic in big database which is belong restaurant.**

PROJECT #12:

Project Title	**: Caesarvision**
Technology	: Core PHP, Mysql, Sql Server, J-Query,Html,CSS
IDE	: Notepad++
Description	**:**

        Project is related to the pizza store in USA management, I have dome some analysis and task which already had application. I have supported some task or ticket for this project. That has taken up to production. This project has been developed by using HMVC in code PHP, purely based on the ERP application, managing lot of franchises and store in USA.

Responsibilities:
- Taken responsibilities to handle CST ticket and take that to production.
- Worked on fronted and backend of the application, understood project follow process how business would get work.
- Got good knowledge on data, understood lot concept, because project had lot of data.

Skill &Interests:

- Fluent in English, Hindi, Marathi
- Good at making friends and flexible to any environment.
- Great interest in playing cricket, chess, mobile games;
- Watching movies and listening music.

Declaration:

        I hereby declare that all the information and facts given above are true to best of my knowledge and belief.

Date: **Yours faithfully**

Place: Hyderabad   **(Sadik B Diwan)**
